1. I like to go snowboarding in my free time. I bought a new helmet on Tuesday. It's blue and yellow. I always wear a helmet and gloves when I go snowboarding. When I'm older, I want to make movies and design video games! What kind of video games do you like?

Danny

2. I have wavy hair and brown eyes. My sister has wavy hair, too, but it's shorter. We're going to swim in the ocean next weekend. I'm going to take my swimsuit and towel. When I go to the beach, I always put on sunscreen. What do you like to do on vacation?

Emma

3. I visited my friend yesterday. We saw a parade, and I took pictures! I practiced the violin yesterday, too. Tomorrow is my dad's birthday. I'm going to play music for him. I want to be a musician when I grow up. What do you want to be when you grow up?

Julie

4. My family went camping last weekend. My brother likes hiking, but I don't like it at all. I like canoeing a lot, but I'm not very good at it. I'm very good at grilling hamburgers! Today we ate sushi for lunch. It's my favorite food. I drank tea with it. What's your favorite food?

Marco Polo and the Silk Road

The Silk Road is over two thousand years old and six thousand kilometers long. It goes across Europe and Asia. Many people traveled on this road to buy and sell **silk** and other **goods**.

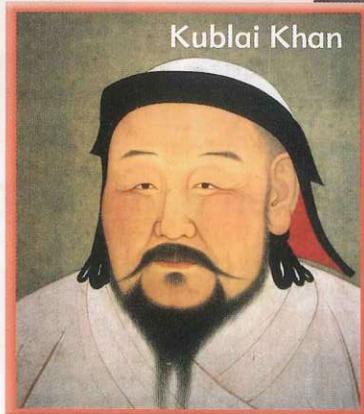

Marco Polo

Marco Polo traveled on the Silk Road when he was 17, in the year 1271. He traveled from Italy to China and saw many new things. The days were very hot and the nights were cold. Sometimes there was no food or water. It was a **difficult** road to travel on, but Marco felt confident. He traveled on the Silk Road for three years. When he was 21, Marco met the **ruler** of China, Kublai Khan. He lived in China for the next seventeen years.

Marco **returned** to Italy when he was 41. He met the writer Rustichello, who wrote a book called *The Travels of Marco Polo*. Many people read this book, and Marco **became famous**. Marco lived to the age of 70. You can still see his house in Italy today.

Star Camp

When I was on vacation, I went to a camp where boys and girls look at the stars. At the campsite, a boy named Jason was setting up his tent. I asked him what he was learning about the stars.

"I'm learning their names and how to read a star map," said Jason. "It's a lot of fun."

"When is the best time to look at the stars?" I asked.

"The best time to look is late at night, when it's clear and not cloudy," said Jason.

The Cave

Danny and Mike are studying insects when they find some animal tracks. They **follow** the tracks to a cave. Mike takes out his flashlight and looks inside.

“Let’s explore it!” says Danny. In the cave, they find more tracks. They see brown spiders, green frogs, and black ants.

Then they hear something behind them.

“Hi, Danny. Hi, Mike,” says Emma. “Where were you all day?”

“Emma! Julie!” the boys **shout**.

“We got lost!” says Mike. “Which way is the campsite?”

“It’s that way,” says Julie. “We’ll go with you.”

“Thanks a lot! Is it **far**?” asks Mike.

“Not really,” says Emma. “Look over there!”

Emma points to some trees. Mike and Danny look. The campsite is right in front of them!

The boys walk for a long time. They start to worry, but then Mike sees a **way out**.

“Look, Danny!” says Mike. “We should go back to the campsite.”

The boys are hungry and tired. They look around but can’t tell where they are.

“I think we’re lost!” says Danny.

The Parts of a Plant

People need plants to live. Plants give us food, clothing, and **oxygen**.

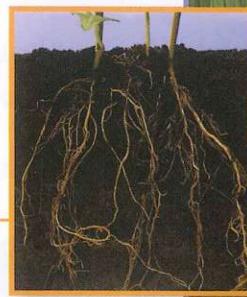

There are over 250,000 kinds of plants in the world. Trees, flowers, and grass are all plants. Green plants need sun and water to grow.

A plant has six parts. Each part has a job to do.

Seeds

Seeds come in many shapes and **sizes**. When seeds are in the earth, they grow and become new plants.

Roots

The **roots** of a plant usually grow **underground**. They take in food and water for the plant.

Stem

The **stem** grows up from the roots and helps the plant to stand. It stores food and brings water to other parts of the plant.

Leaves

Leaves grow out of the stem. They use the sun to make food for the plant.

Flowers

Many flowers are colorful. They help the plant to make seeds.

Fruit

Some plants grow fruit, which have seeds in them. Apples, oranges, and tomatoes are all fruit.

C Answer the questions.

1. Which part of the plant helps to make seeds?
2. How many kinds of plants are there?
3. Where do roots usually grow?
4. Which part of a plant can you find in an apple?

Skills Tip

Use headings to find information.

D Write.

E Look at D. Ask and answer.

Reading, Writing, Listening, & Speaking

How Scouting Started

In 1908, Robert Baden-Powell wrote a book called Scouting for Boys. When boys and girls read it, many of them wanted to become scouts. The book showed them how to be safe and confident in the woods. They learned how to camp, hike, and find animal tracks. They also learned how to identify trees and build a campfire.

People in countries around the world read the book and started scouting groups. Today there are groups in 218 countries. They teach camping, sports, and many other activities. Scouting is now over one hundred years old, and more young people become scouts every year.

1. What did Robert Baden-Powell do in 1908?
2. How many countries have scouting groups?

Biomes of the Earth

Biomes are **natural communities** of plants and animals.

The Earth has six biomes.

The oceans are the biggest biome on Earth and are home to whales, dolphins, and fish. Over seventy percent (70%) of the Earth is ocean. Oceans give us food and oxygen. Water from the oceans goes into the air and comes back as rain.

Our lakes and rivers are **freshwater**. Turtles and ducks live in this biome. Only about three percent (3%) of the Earth's water is freshwater.

About thirty percent (30%) of the land on Earth is **desert**. Deserts get very little rain and are the driest biome. They are also the hottest biome. Deserts are home to animals like snakes and lizards.

Over thirty percent (30%) of the land on Earth is **forest**. This biome has many trees, plants, and animals. The Earth has forests in hot and cold places. Forests are the biggest biome on land.

Grasslands have a lot of grass, but they do not have many trees. In North America, grasslands are home to rabbits and snakes. In Africa, zebras, elephants, and lions live in grasslands.

The **tundra** is the coldest biome and is home to foxes and bears. There are about seventeen hundred kinds of plants in the tundra.

C Answer the questions.

The Rainforests

Forests that get a lot of rain and have many tall trees are called rainforests. Rainforests are home to more plants and animals than any other place on Earth. Most of the world's freshwater is in rainforests. They also make about twenty percent (20%) of the Earth's oxygen.

Rainforests are important, but people are cutting them down. They sell the trees, and then use the land for farming. What will happen to the animals that live there? Some animals like the macaw, sloth, and spider monkey won't have a place to live. We need to take care of the rainforests today, to make sure that the Earth stays healthy in the future.

How to Be a Healthy Student

Students have busy lives. Many go to school every day, and they often have activities after school. They usually have a lot of homework. To be a happy and **successful** student, you need to stay healthy. Here are three things you can do.

once
twice
three times

a day
a week

1. Exercise

Students often sit at their desks for hours, but it's important for them to **exercise**, too. Try to get some exercise once or twice a day. When **possible**, go for a walk or ride your bike to school. Exercise can be more fun when you do it with a friend. You could also join a sports team.

2. Eat Good Foods

Pizza and ice cream taste good, but they're not always good for your health. It's important to eat **balanced meals** three times a day and to get enough fruits and vegetables. Eating breakfast is good for you, too.

3. Have Good Habits

Healthy **habits** will help you do well every day. Floss your teeth at least once a day. Take a shower often and go to bed **early**. Always get enough sleep. It can help you do better at school and on tests!

C Answer the questions.

1. What are three ways to stay healthy?
2. How often should you exercise?
3. What kind of meals should you eat?
4. How can sleep help you?

The Great Pyramid of Giza

There are over one hundred pyramids in Egypt, but the biggest is the Great Pyramid of Giza. It's about forty-five hundred years old and 138 meters tall. It **took** a lot of people, a lot of stones, and a lot of time to build it.

about
around
approximately

How many people did it take?

It probably took around thirty thousand people to build the Great Pyramid. Scientists aren't sure who the builders were, but they were probably **farmers**, workers, and **artisans**.

How many stones did it take?

It took approximately two million stones to build the Great Pyramid. The stones were very heavy. Many people think that the builders cut and **moved** these stones.

How much time did it take?

We think it took about twenty years to build the Great Pyramid. Scientists think that after the builders cut the stones, they **pulled** them many kilometers to the building **site**. Then, they pulled the stones up to the top of the pyramid.

C Answer the questions.

1. How old is the Great Pyramid of Giza?
2. Who were the builders?
3. How did the builders move the stones?
4. How many pyramids are there in Egypt?

Skills Tip

Pay careful attention to details when you listen and read.

Rules for Running

Running is a great way to exercise. To be safe when you run, always follow these rules.

Walk or run slowly at first. You can then run more quickly. This will help your body warm up and keep you from getting hurt. Relax your arms, hold your head up, and keep your hands cupped. Always wear colorful clothes and be careful of traffic. Comfortable running shoes are important, too.

After you run, walk slowly for five to eight minutes. This will help you cool down. Relax and drink some water. You can run often, but don't run every day.

These rules will help you get in shape and stay healthy. Keep running!

1. What should you wear to go running?
2. How should you cool down?
3. How will these rules help you?

Climbing Mount Everest

1 foot = 0.3048 meters

Mount Everest in Nepal is the **highest** mountain in the world. It's over twenty-nine thousand feet high. In 1924, George Mallory and Andrew Irvine tried to **reach** the top of Mount Everest, but they could not do it.

In 1953, twelve **British** mountain climbers wanted to climb to the top. The climbers camped at twenty-six thousand feet. Two climbers tried to reach the top, but they could not do it. Edmund Hillary and Tenzing Norgay **left** the camp on May 28th and reached the top the next day. They became the first people to climb to the top of Mount Everest.

Over twelve hundred people have now climbed to the top of Mount Everest. In 1963, James Whittaker became the first person from the USA to reach the top. Junko Tabei from Japan became the first woman to reach the top in 1975. In 2000, 142 climbers reached the top. All of them were **grateful** to Edmund Hillary and Tenzing Norgay for **leading** the way.

Clean Energy

People are using more **energy** every day. We use energy to drive our cars and to power our computers, phones, and TVs. Scientists are excited about three **sources** of natural energy. These energy sources are clean and will never run out.

Wind Energy

Scientists have designed **wind turbines** that use strong winds to make energy. Some turbines make enough **electricity** for one thousand homes. Many countries now use wind turbines for electricity.

Water Energy

Moving water can also make energy. Scientists have designed **dams** that make electricity on many rivers. Two of the biggest dams are in China and Brazil, but there are thousands of others around the world.

Solar Energy

Scientists have designed **solar panels** to turn energy from the sun into electricity. These panels are now on many buildings, where they collect solar energy.

In the future, people will use even more energy, but more of it will come from clean energy sources. When people use these sources, they help to keep the Earth clean.

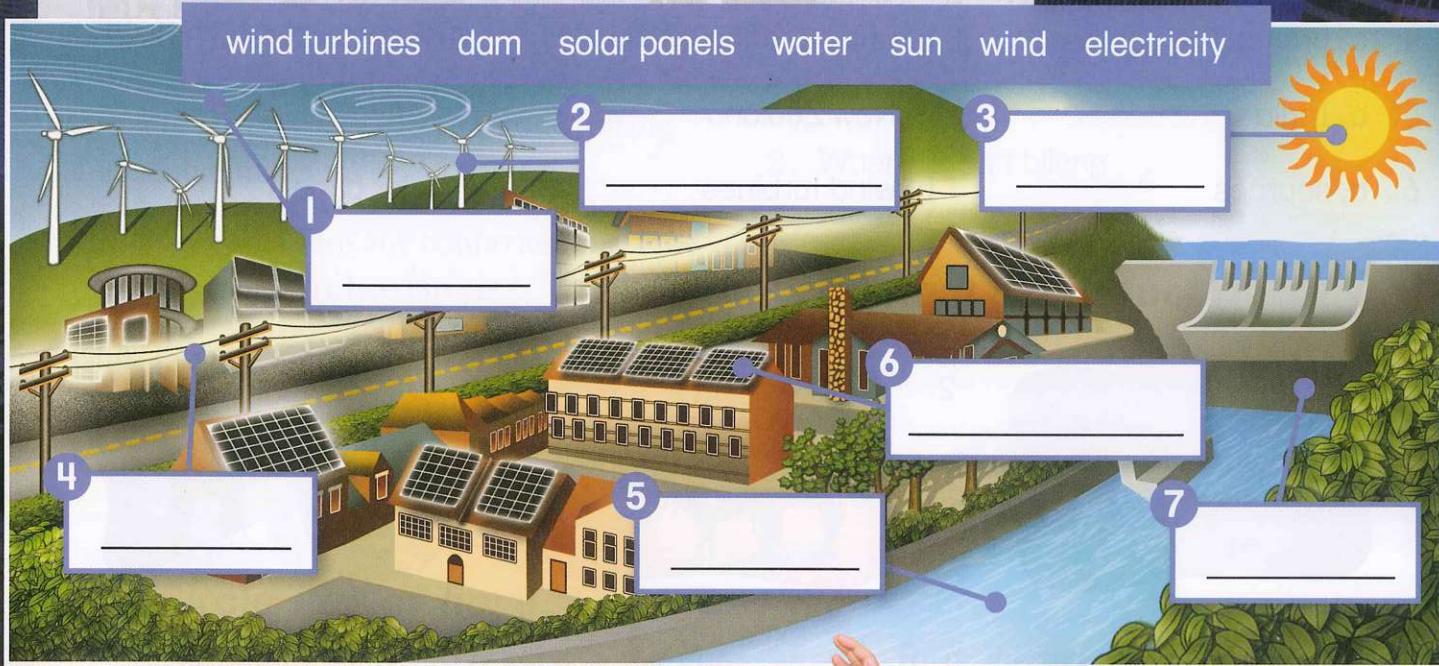

Skills Tip

The introduction and conclusion of a reading tell you the topic.
